☞ Google Scholar

Aug. 2024 – Current

Sept. 2021 – Jun. 2024

Advisor: Prof. Weizhan Zhang

EDUCATION

Michigan State University

o Ph.D. in Computer Science Advisor: Prof. Xiaoming Liu

Xi'an Jiaotong University

• M.S. in Computer Science and Technology. Advisor: Prof. Weizhan Zhang

Sept. 2017 – Jun. 2021 Xi'an Jiaotong University

o B.E. in Computer Science, Qian Xuesen Honors College

University of California, Berkeley Aug. 2019 – Jan. 2020

o Berkeley International Study Program

RESEARCH INTERESTS

Computer Vision: 3D Shape Understanding, 3D Detection

Machine Learning: Self-supervised Representation Learning, Multi-modal Learning

PUBLICATIONS (* Equal Contribution)

- [1] Zhihao Zhang*, Shengcao Cao*, Yuxiong Wang. TAMM: TriAdapter Multi-Modal Learning for 3D Shape Understanding. In Proceedings of the IEEE/CVF Conference on Computer Vision and Pattern Recognition (CVPR), 2024. [Paper]

AWARDS & HONORS

SCHOLARSHIPS

\circ National Scholarship, Ministry of Education in China (< 0.1%)	Nov. 2023
\circ Tencent Scholarship (< 0.1%)	Nov. 2023
• The First Prize Scholarship of Xi'an Jiaotong University	Nov. 2022
o Outstanding Freshman Scholarship (Grade 1)	Nov. 2021

AWARDS

o Outstanding Postgraduate of Xi'an Jiaotong University	Jun. 2024
o Outstanding Graduate of Xi'an Jiaotong University	Jun. 2021
• Honorary graduate of Qian Xuesen College	Jun. 2021

RESEARCH EXPERIENCES

Computer Vision Group, University of Illinois at Urbana-Champaign Research Assistant. Advisor: Prof. Yuxiong Wang

Champaign, USA

Jun. 2023 - Jan. 2024

- Addressed the domain gap between the 2D images rendered from 3D shapes and the natural images, avoided the vision-semantic feature disparity from impairing 3D representation pre-training.
- Proposed a novel multi-modal learning framework with two learning stages and three unified adapter modules, TAMM [1], consistently enhancing 3D representations for a variety of 3D encoder architectures and downstream tasks.

Key Laboratory of Intelligent Networks and Network Security, Ministry of Education Xi'an China Research Assistant. Advisor: Prof. Weizhan Zhang Sept. 2021 - Dec. 2022

- Transferred viewport prediction task into a tile classification problem and proposed a Multi-modal Fusion Transformer prediction framework, MFTR [2], which achieved state-of-the-art long-term prediction accuracy.
- Proposed an content-aware 360-degree video streaming system, VRFormer [3], significantly enhanced user's Quality of Experience (QoE), surpassing the capabilities of current state-of-the-art methods.

National Engineering Lab for Big Data Analytics, XJTU

Xi'an China

Research Assistant. Advisor: Prof. Qinghua Zheng

Jan. 2021 - Jul. 2021

- Designed and implemented a real-time live system called Skyclass, a web application that leveraged WebRTC
 and Kurento Media Server (KMS) technologies. This system was engineered to enable seamless, high-quality
 video and audio communication among users.
- Proposed a novel algorithm which utilized LSTM network to estimate bandwidth. This algorithm was successfully deployed into the MiGu player on the IOS platform.

SKILLS

Languages Python, Java, C/C++, Bash, LaTeX, Golang, HTML/CSS

Libraries / Softwares OpenCV, Open3D, Pytorch, Tensorflow Developer Tools Git, Docker, PyCharm, Vim, VSCode

ACADEMIC SERVICES

Conference Reviewer:

- o ACM International Conference on Multimedia (ACM MM 2023)
- o European Conference on Artificial Intelligence (ECAI 2023)

Last updated: Friday 20th September, 2024
